

# PACK

**T**he NC State Industrial Extension Service (IES) helps companies grow their profits by lowering costs, improving product quality, and making the workplace safer and more efficient. IES works with food processors and packagers needing help with:

- **Changing global market conditions**
- **Regulatory compliance**
- **Energy consumption**
- **Process waste reduction**

IES works hand-in-hand with North Carolina food processors and packagers to reshape their production processes based on proven methods and technologies. IES can also provide your company with a systematic, disciplined method for growing sales.

Contact **NCSU IES Specialist Mike Joyce** at **919.227.6266**.

And let's go Pack!

**IES** a NIST | Network  
MEP | Affiliate

With more than 50 years of helping North Carolina's businesses become more profitable, NC State University's Industrial Extension Service (IES) will create over \$1 billion in positive economic impact for the state by 2010. IES is an affiliate of the federal Manufacturing Extension Partnership (MEP) which partners every day with manufacturers throughout the United States to help them reduce costs, save jobs, and increase their global competitiveness.
