

Lean Six Sigma Government

Why Consider an IES Lean Six Sigma Government Solution?

The world of process improvement is growing exponentially in the service industries. Government is in the midst of rapid change. Employees are being required to manage their processes more efficiently and agencies are being asked to do much more with fewer resources and must change their processes to accomplish this task. This is creating the “perfect storm” for engagement in these areas.

Lean Model—Basic Steps for Implementation:

- › Identify activities that add value to the customer
- › Establish the sequence of flow for the process (current state value stream)
- › Eliminate or reduce the activities that do not add value to the customer
- › Create a more organized work flow
- › Create a continuous improvement culture which strives to eliminate waste

Our Lean Six Sigma Approach Can Include:

- › Lean Executive Overview
- › Strategic Planning Sessions
- › Lean Strategic Value Stream Mapping Event
- › Lean Education and Training sessions for managers
- › Lean Education and Training sessions for team members and front line staff
- › Kaizen Rapid Improvement Events
- › Lean Facilitator Education and Training
- › Lean Certification Program
- › Organizational Coaching and Mentoring

Lean Government—Provides Solutions to Support Organizations:

- › Educational and tool based training programs for all levels of a client’s organization including executives, directors, supervisors and front-line staff
- › On-site assessment of client lean needs
- › Creating a flexible business model for “Organizational Excellence using Lean Thinking” (transformation) in all types of government organizations (small/medium/large)
- › Providing customized solutions to address gaps that clients experience in performance excellence.

Streamline processes...build capabilities to sustain new ways of working...make continuous improvement part of everyone’s day-to-day activities.
